ELSEVIER International Journal of Mass Spectrometry and Ion Processes 140 (1994) 187–188

International Journal of Mass Spectrometry and Ion Processes

SUBJECT INDEX

Angular distributions
Energy and angular distributions of sputtered particles 1

Benzene
Surface-induced dissociation and ion–surface reactions at insulating surfaces 177
Benzyne-related mechanisms
Benzyne-related mechanisms in the gas phase ion/molecule reactions of haloarenes 163

Cerium
Thermoemission of Ce^+ ions and its fluctuations 123
Collision induced dissociation
Quantitative assessment of multiple excitation events in Fourier transform ion cyclotron resonance mass spectrometry 149

Dimethylsulfoxide
Surface-induced dissociation and ion–surface reactions at insulating surfaces 177

Energy distributions
Energy and angular distributions of sputtered particles 1
Excitation profiles
Quantitative assessment of multiple excitation events in Fourier transform ion cyclotron resonance mass spectrometry 149

Fourier transform ion cyclotron resonance mass spectrometry
Quantitative assessment of multiple excitation events in Fourier transform ion cyclotron resonance mass spectrometry 149

Haloarenes
Benzyne-related mechanisms in the gas phase ion/molecule reactions of haloarenes 163

Imaging
Self imaging of surface ionization ion sources — where do the ions come from? 111
Insulators
Surface-induced dissociation and ion–surface reactions at insulating surfaces 177
Ion mobility spectrometer
On the reactions of perfluoroisobutene with some anions in the gas phase: studies in an ion mobility spectrometer 133
Ion optics
Self imaging of surface ionization ion sources — where do the ions come from? 111
Ion sources
Self imaging of surface ionization ion sources — where do the ions come from? 111
Ion/molecule reaction
On the reactions of perfluoroisobutene with some anions in the gas phase: studies in an ion mobility spectrometer 133
Ion/molecule reactions
Benzyne-related mechanisms in the gas phase ion/molecule reactions of haloarenes 163
Ion–surface collisions
Surface-induced dissociation and ion–surface reactions at insulating surfaces 177

Laser desorption
Thin layer chromatography–mass spectrometry using infrared laser desorption 127
Laser ionization
Thin layer chromatography–mass spectrometry using infrared laser desorption 127

Naproxen
Thin layer chromatography–mass spectrometry using infrared laser desorption 127
Negative ions
On the reactions of perfluoroisobutene with some anions in the gas phase: studies in an ion mobility spectrometer 133

0168-1176/94/$07.00 © 1994 Elsevier Science B.V. All rights reserved

Preformed ions
Self imaging of surface ionization ion sources — where do the ions come from? 111

Selected ion flow tube
On the reactions of perfluoroisobutene with some anions in the gas phase: studies in an ion mobility spectrometer 133
Sputtering
Energy and angular distributions of sputtered particles 1
Statistical fluctuations
Thermoemission of Ce^+ ions and its fluctuations 123
Surface ionization
Self imaging of surface ionization ion sources — where do the ions come from? 111
Surface-induced dissociation
Surface-induced dissociation and ion–surface reactions at insulating surfaces 177

Thermoemission
Thermoemission of Ce^+ ions and its fluctuations 123
Thin layer chromatography–mass spectrometry
Thin layer chromatography–mass spectrometry using infrared laser desorption 127
Time-of-flight
Thin layer chromatography–mass spectrometry using infrared laser desorption 127
